Perfect Choice To Clear Infection

B-Floxacin

Enrofloxacin 10% Injection

- * Enrofloxacin is a fluoroquinolone antibacterial drug.
- * It is bactericidal with a broad spectrum of activity against gram +ve & gram -ve organism
- * It works by stopping the action of a bacterial enzyme called DNA-gyrase. This prevents the bacterial cells from dividing and repairing, thereby killing them.

Indications :

Respiratory Tract Infections

Urinary Tract Infections

Skin & Soft Tissue Infections

Wound Infections & Mycoplasmosis

B-Floxacin

Perfect Choice To Clear Infection

Antispasmodic, Analgesic,
Anti inflammatory With
